

Practical Measures for Improving Water Quality - 28th March 2012

You are invited to LEAF's **Practical Measures for Improving Water Quality** event at Church Farm in Somerset.

This event, supported by Catchment Sensitive Farming, will look at ways of improving how your farming practices impact water quality. It will include:

- A farm walk to look at simple, **cost effective drainage**, soil management and erosion control measures that can help **improve resource management**.
- Talks from key experts on diffuse water pollution from agriculture, water quality and how to **reduce the risk of surface run-off**.

To book your place at this FREE event, please contact Emma Pritchard at LEAF on 024 7641 3911 or emma.pritchard@leafuk.org

Church Farm, Stratton on the Fosse, Radstock, Somerset

Date: 28th March 2012

Time: 10:30 am - 2:30 pm
